

Free Nutrition Plan

Basic nutrition for fat loss and muscle gain

Mert Güngör - Personal Coaching Augsburg

Overview

Goal	Create a simple nutrition structure that fits training and everyday life.
Duration	4-week starter phase
Level	Beginner to early intermediate

Meal structure

Meal	Example
Breakfast	Oats with skyr/curd, berries and nuts
Lunch	Chicken/tofu, rice/potatoes, vegetables and a little olive oil
Snack	Protein shake or yogurt plus fruit
Dinner	Salmon/eggs/legumes, salad and whole-grain bread

Makros / Macros / Макросы

Focus	Note
Protein	1.6-2.0 g per kg body weight per day
Carbohydrates	preferably placed around training
Fats	not too low, e.g. nuts, oil, eggs, fish
Water	2-3 liters daily as a guideline

Important notes

- Include a protein source in every main meal.
- Drink 2-3 liters of water per day.
- Use 80/20: eat mostly well, but stay flexible.
- Fat loss requires a moderate calorie deficit.
- Muscle gain needs training, enough protein and patience.

Optional supplements

Not required, but practical: whey protein for protein intake, creatine monohydrate for strength performance, omega-3 if fish intake is low. Check quality and tolerance.

Want a personalized plan?

This plan is a general starting point. For personal goals, nutrition, technique checks and ongoing accountability, individual coaching makes sense.
