Day 3	Full body C	Bird dog	3	10 each side	45 sec	Reach slowly
Day 3	Full body C	Crunches	3	12-15	45 sec	Keep core tight

Progression

When you complete all reps with clean form, slightly increase the weight next session or add 1-2 reps.

Cooldown

5 minutes easy movement, then lightly stretch chest, back, legs and hips.

Important notes

- Technique before weight: keep every rep controlled.
- Do not train to complete failure every set.
- Write down weights and reps after each session.
- Plan at least one rest day between sessions.

Want a personalized plan?

This plan is a general starting point. For personal goals, nutrition, technique checks and ongoing accountability, individual coaching makes sense.
